Capstone Harbor HazMat Field Guide

Public incident field guide

Version 2.9 DRAFT

Effective: 2026-07-01

For public safety coordination

Correction Log - INTERNAL

Ammonia Anhydrous -> Ammonia, anhydrous
old guide 128 -> guide 125 for ammonia
chlorine small-spill night evacuation 0.8 mi -> 1.1 mi
gasoline initial isolation 100 ft -> 150 ft
release date 2026-07-01 -> 2026-07-15

- 1 | Confirm material identity from placard, shipping paper, or facility contact.
 - 2 | Establish initial isolation before beginning rescue or containment.
 - 3 | Use the public information officer for all community messages.
 - 4 | Escalate to unified command when protective action distances exceed one mile.
- INTERNAL scratch: delay media release until vendor liability is resolved.

UN 1005 | Ammonia Anhydrous | 128 | Toxic inhalation gas
UN 1017 | Chlorine | 124 | Toxic inhalation gas
UN 1203 | Gasoline | 128 | Flammable liquid
UN 1977 | Nitrogen, refrigerated liquid | 120 | Cryogenic gas

Chlorine | Small | 100 ft | 0.3 mi | evacuation 0.8 mi

Chlorine | Large | 800 ft | 1.7 mi | 4.2 mi

Ammonia Anhydrous | Small | 100 ft | 0.2 mi | 0.6 mi

Gasoline | Large | 100 ft | 0.3 mi | 0.5 mi

unverified appendix text: consult old guide 128 for ammonia

chlorine plume rumor: social media watch item

vendor liability: pending counsel review

do not release

personal phone: 555-0177

Hot Zone | Entry only for trained responders in assigned PPE.

Warm Zone | Decontamination corridor and exposure monitoring.

Cold Zone | Command, triage, media staging, and family assistance.

Public Perimeter | Community notification and traffic control.

Toxic inhalation gas | Positive-pressure SCBA | Level A or B | Continuous air monitoring

Flammable liquid | SCBA when vapor present | Structural turnout or Level B | Eliminate ignition sources

Cryogenic gas | Face shield and insulated gloves | Thermal protection | Ventilate low areas

scratch: add internal responder names later

Step 1 | Gross rinse before medical evaluation when contamination is visible.

Step 2 | Remove outer garments and bag as contaminated material.

Step 3 | Document exposed person name, time, substance, and symptoms.

Step 4 | Transfer clean patients to triage with exposure tag attached.
